

BRANDON TATE

IT OPERATIONS LEADER | INFRASTRUCTURE | SERVICE DELIVERY | IAM

Round Rock, TX | (917) 882-7714 | brandontate@outlook.com | [LinkedIn](#) | [brandontate.info](#)

PROFESSIONAL SUMMARY

IT operations leader with 12 years of progressive experience supporting distributed, business-critical environments across hospitality, professional services, gaming, semiconductor, and healthcare organizations. Leads technology operations for multiple hotels, spanning infrastructure, end-user computing, service delivery, identity and access, property systems, vendors, budgets, projects, and executive stakeholder support. Experienced with Microsoft 365, Active Directory and Entra ID, ServiceNow adoption, networks and Wi-Fi, endpoint lifecycle, Oracle OPERA Cloud, Aloha and Micros POS, A/V, telecommunications, incident escalation, and operational security. Known for translating technical issues into business impact, standardizing support processes, coordinating cross-functional teams, and maintaining continuity in 24/7 guest-facing operations.

LEADERSHIP AND TECHNICAL STRENGTHS

IT Operations Leadership: Multi-site operations, service delivery, escalations, stakeholder communication	Infrastructure: LAN/WAN, Wi-Fi, VPN, access points, endpoints, A/V, telecom, vendor-managed services
Identity and Security: Active Directory, Entra ID, MFA, BitLocker, access lifecycle, least privilege	ITSM and Support: ServiceNow, incident and request workflows, SLAs, SOPs, documentation, root-cause reduction
Cloud and Workplace: Microsoft 365, Windows, mobile devices, provisioning, collaboration, asset lifecycle	Hospitality Technology: Oracle OPERA and OPERA Cloud, Aloha and Micros POS, guest and back-office systems
Program Delivery: Projects, migrations, hotel transitions, procurement, budgets, inventory, change coordination	Partners and Vendors: MSPs, ISPs, Dell, Shift4, Infor, Shopify, Toast, corporate technology teams
Leadership Approach: Coaching, prioritization, process improvement, customer experience, risk-aware operations	Automation and Growth: AI infrastructure, Microsoft security, cybersecurity and cloud-security development

PROFESSIONAL EXPERIENCE

Area Manager of Information Technology | Hyatt / Bunkhouse Group | Texas

2023 - Present

Promoted from Senior IT Support Specialist; lead day-to-day technology operations for seven hotels and coordinate support across additional hospitality assets and corporate partners.

- Direct multi-property IT operations across front-desk and back-of-house environments, balancing guest experience, business continuity, cybersecurity, and property leadership priorities.
- Own escalations and coordinate resolution across Microsoft 365, Active Directory and Entra ID, Windows endpoints, mobile devices, networks, Wi-Fi, VPN, printers, A/V, telecommunications, POS, and hotel systems.
- Partner with property executives, department leaders, Hyatt corporate technology teams, and managed service providers to prioritize incidents, communicate operational impact, and coordinate corrective action.
- Support ServiceNow rollout and adoption by improving ticket intake, ownership, escalation, documentation, visibility, and consistent support workflows across distributed properties.
- Plan and coordinate endpoint provisioning, onboarding and offboarding, password and access requests, MFA, BitLocker, asset inventory, replacement cycles, and secure account lifecycle practices.
- Coordinate Oracle OPERA and OPERA Cloud transitions, including readiness planning, vendor alignment, workstation and peripheral preparation, issue escalation, and continuity support.

- Lead network and property technology initiatives involving wireless access points, ISP escalation, network-run planning, workstation deployments, A/V restoration, telecom, and technology refreshes.
- Manage external providers and technology vendors, including service coordination, scope alignment, project scheduling, purchasing input, issue follow-through, and validation of completed work.
- Develop repeatable SOPs, technical documentation, user guidance, inventory practices, and onboarding standards to reduce support friction and improve operational consistency.
- Provide hands-on executive and end-user support while identifying recurring issues, strengthening ownership, and moving the environment from reactive troubleshooting toward structured service management.

IT Systems Specialist | Holtzman Partners / Armanino LLP | Austin, TX **2019 - 2023**

- Delivered systems and end-user support in a professional-services environment, resolving hardware, software, access, connectivity, and collaboration issues for employees with varied technical needs.
- Supported workstation deployment, user setup, troubleshooting, documentation, and escalation while maintaining a responsive, service-oriented experience.
- Coordinated with internal technology teams and vendors on incidents, equipment lifecycle needs, account access, and operational technology changes.

IT Support Specialist | ZeniMax Media / Bethesda Softworks | Austin, TX **2018 - 2019**

- Provided hands-on technical support in a fast-paced game-development environment, addressing endpoint, application, account, peripheral, and connectivity issues.
- Supported employee onboarding, workstation readiness, incident escalation, and clear communication with users and technical partners.

IT Support Specialist | Cirrus Logic | Austin, TX **2017 - 2018**

- Supported corporate end users with workstation, software, account, conferencing, and peripheral issues in a technology-focused environment.
- Documented incidents, coordinated escalations, and contributed to dependable day-to-day workplace technology operations.

Executive Deskside Support Analyst | HCL America / NXP Semiconductors | Austin, TX **2016**

- Delivered high-touch deskside support for executives and business users, emphasizing responsiveness, discretion, issue ownership, and clear communication.
- Troubleshot endpoint, access, connectivity, mobile-device, and meeting-room technology issues and coordinated advanced escalation when required.

Healthcare IT Technician | Columbia University Medical Center / NYSPI | New York, NY **2014 - 2016**

- Supported a healthcare and research technology environment serving more than 2,300 users, with attention to reliability, privacy, and timely incident resolution.
- Provided endpoint deployment, troubleshooting, account support, peripheral support, documentation, and escalation across clinical, administrative, and research functions.

EDUCATION AND CERTIFICATION

Western Governors University | Bachelor of Science in Cybersecurity and Information Assurance | In Progress

Microsoft Certified Azure Fundamentals AZ 900

TECHNICAL ENVIRONMENT

Microsoft 365 | Active Directory | Entra ID / Azure AD | Azure Fundamentals | Windows | ServiceNow | MFA | BitLocker | IAM | Endpoint Provisioning | Asset Management | LAN/WAN | Wi-Fi | VPN | Access Points | Microsoft Teams | Mobile Devices | Oracle OPERA | OPERA Cloud | Aloha POS | Micros POS | A/V | Telecommunications | Vendor and MSP Management | Incident Management | Change Coordination | SOPs | Knowledge Documentation

PROFESSIONAL DEVELOPMENT AND TECHNICAL PROJECTS

- Cybersecurity development focused on IAM, governance, cloud security, security operations, and risk-aware IT leadership.
- Built and administers a home technology lab using Linux, TrueNAS, networking, virtualization, private AI infrastructure, and mixed endpoint environments to strengthen hands-on systems knowledge. Portfolio: brandontate.info.
